WELCOME

Maysa Tariq Eshmawi

Conference President,
MOH Dermatology Lead

Dear Colleagues,

It is my pleasure to invite you to attend the 16th Saudi Society of Dermatology and Dermatologic Surgery Conference in its new format. In alignment with the strategic objective of Saudi Vision 2030, which aims to create a vibrant society by advancing healthcare services and improving the quality and efficiency of evidence-based medicine, the conference will feature an engaging scientific program with renowned speakers from both local and international platforms. These speakers will present the latest advancements and emerging topics in the field.

Additionally, there will be interactive workshops, case presentations, and group discussions covering various aspects of dermatology, aesthetics, and laser treatments. The conference will offer ample networking opportunities, allowing you to connect with colleagues from around the world, as well as representatives from leading pharmaceutical companies exhibiting at the event.

We look forward to welcoming you on April 25th and 26th, 2025, at the Crowne Plaza RDC Hotel in Riyadh for this distinctive and innovative conference. You will have the chance to explore everything related to governance and Vision 2030 in dermatology and aesthetics, along with announcements of programs, lecture series, and products that align with the Society's renewed objectives. We are confident that this conference will be an unforgettable experience, and we eagerly look forward to welcoming you to the Kingdom of Saudi Arabia.

WELCOME

**Abdullah Suleiman
Al-Aqeel**

President of the Saudi Society
of Dermatology and
Dermatologic Surgery

Dear Colleagues,

It is with great pleasure that my colleagues, dermatologists in the Kingdom of Saudi Arabia, and the members of the Board of Directors of the Saudi Society of Dermatology and Dermatologic Surgery, extend a warm welcome to all participants. We deeply appreciate your participation in the organization of the 16th World Congress of Dermatology and Dermatologic Surgery. One of the primary objectives of the Saudi Society of Dermatology and Dermatologic Surgery is to enhance scientific and practical expertise in the field of dermatology. With this aim, the Society has taken on the responsibility of organizing global and local conferences and seminars, providing a platform for specialists in the Kingdom and the region to present their studies and research findings.

These events also serve as a valuable opportunity for trainee and newly practicing dermatologists to benefit from the sessions and lectures, allowing them to stay updated on the latest diagnostic and therapeutic advancements in their field. In addition, the Society encourages scientific research in dermatology and related fields. It conducts essential studies and research aimed at the prevention of certain skin diseases, particularly those endemic to the region, and publishes the results in scientific journals.

Furthermore, the Society organizes intensive scientific courses for trainee doctors to prepare them academically and practically for fellowship exams. The Society has also launched a periodic scientific journal dedicated to publishing research and studies in dermatology, as well as the Arab Journal of Dermatology, a specialized publication focused on dermatologic surgery and aimed at raising health awareness across all segments of society. This journal also serves as a platform to correct many common health misconceptions through scientific articles, especially those related to dermatology. At this juncture, I would like to emphasize that achieving our aspirations in our specialized field requires great effort, perseverance, and diligent work from us, the doctors. This is well-known to everyone, and I urge my colleagues to actively participate in these scientific gatherings with their research, particularly our junior and trainee colleagues.

Early and active participation has become a critical necessity for us to maintain the esteemed level we have attained and to achieve even greater success in the future, God willing. Finally, I would like to extend my gratitude and acknowledge the efforts of all my colleagues on the organizing and scientific committees of this conference for their dedicated work in preparing and organizing this scientific event.
